Products we are happy to put our name on...

People you can trust...

Kinder & Co is an industry renowned, privately owned Australian company founded in 1985 by its current Chief Executive Officer Neil Kinder and our Marketing Manager Christine Kinder.

Our still family owned company origins began by supplying the Bulk Materials Handling industry, and we truly believe no other heavy process business in Australia has the variety of product or greater comprehension of the unique challenges in those environments.

Our registered **Kinder K** trade mark is now widely recognised within the industry as an indicator of purposely designed, high quality, reliable and great value products. Likewise **Kinder & Co's** business reputation is built and driven primarily by second-to-none customer service excellence, backed by imaginative design and innovative high performance product solutions.

- > Metal Detector Products
- > Screening Products
- > Belt Weighing Equipment

Bucket Elevator Components

- > Bucket Elevator Buckets
- > Bucket Elevator Bolts

Our Performance Promise

As Kinder & Co is a leading, nationally recognised, specialist company in the Bulk Materials Handling field, our reputation enables us to be confident of successfully meeting our customers supply criteria in all areas. Our vast range of stocked, Kinder & Co designed, market leading and competitively priced equipment can provide you with the vital backup business support required.

Our regular stock inventory of approximately 4000 common conveyor hardware items demonstrates our commitment to a quick turnaround on customer orders, minimising any downtime potential. At a time when other conveyor component suppliers struggle to meet customer demands, we at Kinder & Co proudly offer Australia's most comprehensive range of belt conveyor hardware stock.

Our Qualified Team

Achieved over nearly three decades in business, our numerous customers have recognised Kinder & Co to be their full service Bulk Materials Handling partner. These supportive and loyal customers have placed their trust in our specialist team of tertiary qualified, industry knowledgeable and site trained sales engineers to offer best in class levels of service and support.

As part of our commitment to our customers, we arrange regular plant visits and construct Kinder & Co On-Site Reports to assess existing heavy process equipment. These invaluable findings help to identify areas for improvement, minimise problems before they arise, and educate our customers at a very low or even zero hardware cost expense.

Our Passionate Motivations

At Kinder & Co we offer corporate level professionalism with family level flexibility and honesty. Our staff have been specifically chosen for their beyond reproach ability to treat people with respect and to empathise with others.

Our passionate motivation is to envision a product range and a level of service that ensures our customers run their sites in the safest environment possible, in order to move their bulk materials as efficiently and cost effectively as possible.

At Kinder & Co we are not a business that accepts the industry status quo. We search the world for the latest engineering advancements to improve our customers operations, and most importantly, their bottom line.
